GRAVE FOREST SITUATION FOLLOWS SEPTEMBER HURRICANE

Woodland problems of timber salvage and fire control created in many towns by the September hurricane are of the greatest importance. Good citizenship calls for personal and widespread action!

The salvage of every thousand feet of logs which can be sold means money for landowners, wages for workers, employment for trucks, teams and machinery, as well as reduced forest fire hazard for all. If owners of windthrown timber have not yet acted, they should communicate with those who can help. Town chairmen are fully informed; State Advisory Agents can help to start logging by suggesting names of operators and giving other useful advice; Federal Agencies are increasing the number of log storage places as rapidly as possible. Individuals must now cooperate!

Forest fire danger for several years will be greater than usual. So much work must be done by public agencies to reduce hazard along roadsides, near improved and other exposed areas that many places will remain hazardous for some time to come. Individual landowners must take a personal interest! Aid in clean-up work through the Agricultural Conservation Program is available to any woodland owner at \$4.00 per acre on areas up to 15 acres. The County Agent should be consulted.

Support your local Forest Fire Wardens and Deputies. They are planning, with State and Federal agencies, an intensive campaign to control fires. Help them by strict observance of the fire laws. Kindle no open fires without a permit from the Warden except when the ground is covered with snow. Cooperate by reporting fires you may see and in other ways. Fire fighting tool supplies are inadequate and should be reasonably increased by many towns. You can help, and it will pay, to prevent forest fires!
